

Project Executable Files

Date	01 July 2026
Team ID	
Project Name	LaunchPad AI – Smart Business Idea Evaluation System
Maximum Marks	3 Marks

Project Executable Files

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File/Folder Structure

LaunchPadAI/

|

|— app.py

|— config.py

|— requirements.txt

|— README.md

|— .env.example

|— .gitignore

|

|— models/

| |— startup.py

|

|— routes/

| |— home.py

| |— history.py

|

|— services/

| |— gemini_service.py

| |— prompt.py

|

|— templates/

| |— base.html

| |— home.html

```

| |— validate.html
| |— report.html
| |— history.html
|
|— static/
| |— css/
| | |— style.css
| |
| |— js/
| | |— script.js
|
|— instance/
| |— launchpad.db
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://launchpadai-y3c5.onrender.com
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Render
Repository Link	https://github.com/Ganesh01729/LaunchPadAI
Demo Video Link	https://drive.google.com/file/d/1dloS46LbK4Z8B76qe5UZeoUqMNm8pDSA/view?usp=drive_link

Step 4: Run Instructions

1. Install **Python 3.10** or above.
2. Open the project folder in **Visual Studio Code**.
3. Install the required libraries:

```
pip install -r requirements.txt
```

4. Create a **.env** file and add:

```
SECRET_KEY=your_secret_key
```

```
GEMINI_API_KEY=your_gemini_api_key
```

```
GEMINI_MODEL=gemini-2.5-flash
```

5. Open the terminal in the project folder.
6. Run the Flask application:

```
python app.py
```

7. Open your browser and visit:

```
http://127.0.0.1:5000
```

8. Enter the startup details.
9. Click **Analyze Startup**.
10. View the AI-generated report, dashboard, and history

Deployment using Render

1. Push the project to GitHub.
2. Create a Render account and connect GitHub.
3. Create a new **Web Service**.
4. Configure:

Build Command

```
pip install -r requirements.txt
```

Start Command

```
gunicorn app:app
```

5. Add environment variables:
 - **SECRET_KEY**
 - **GEMINI_API_KEY**
 - **GEMINI_MODEL**
6. Deploy the application.
7. Open the generated Render URL and verify the application.
8. Render automatically redeploys whenever changes are pushed to GitHub.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Requires an internet connection to access the Google Gemini API.	Internet connectivity is required for AI analysis.
2	Uses a local SQLite database, which is suitable for small-scale deployments.	Can be upgraded to PostgreSQL or MySQL for production use.
3	User authentication and role-based access are not implemented.	Planned as a future enhancement.
